EDUCATION

Bina Nusantara University **Jakarta, Indonesia**
Computer Science (Specialization in Software Engineering) *September 2023 - Present*

EXPERIENCE & ACTIVITIES

NTT DATA, Inc. (PT NTT Indonesia Technology) **Jakarta, Indonesia**
Automation Engineer Intern *February 2026 - 2027*

- Developed and refactored Python backend components using SQLAlchemy ORM, repository/service patterns, and modular architecture, covering authentication, business logic, device parsing, and automated report generation.
- Built an automated document audit workflow using Power Automate and SharePoint to validate project files and visualize audit results in Power BI.

Bina Nusantara Computer Club (BNCC) **Jakarta, Indonesia**
Activist *November 2023 - 2024*

- Contributed as a Front-End Developer in the TPM (Technology Project Member) Final Project for a Hackathon-themed challenge in 2024.
- Person-in-Charge for promotion and registration at BNCC Techno Talk I 2023.

PROJECTS

Food Waste Reduction Platform *2025*
Full-Stack Developer

- Built a full-stack food reservation platform using Laravel with buyer and seller roles, authentication, product browsing, reservations, order tracking, and purchase history.
- Developed a seller dashboard for product CRUD, inventory management, order processing, profile management, and synchronized order status updates; deployed the application on Railway.

Automation Preventive Maintenance *2026*
Developer

- Developed an automation system for Preventive Maintenance reporting that processes logs from multi-vendor network devices and consolidates device information, configurations, status, and inspection results into standardized reports.
- Refactored and migrated legacy Python components into a more modular and maintainable architecture using object-oriented design and reusable components, reducing duplicated logic and simplifying future device integrations and feature changes.

SKILLS

Programming: Python, Java, JavaScript, C, C#, PHP, SQL
Technologies & Tools: Laravel, ASP.NET, Git, Power Automate, Power BI, Linux, Sharepoint
Concepts: Object-Oriented Programming (OOP), REST APIs, Design Patterns, ORM, Database Design, Refactoring, Agile Development, Software Development Life Cycle (SDLC), Workflow Automation
